## EXPERIENCE

### ELERINMOSA INSTITUTE OF TECHNOLOGY | STUDENT

April 2021 - Present | Erin-Osun, Nigeria.

- Worked on Network Intrusion Detection System
- Installation of Pfsense Firewall
- Deployed NIDS tools on Network resources

## PROJECTS

### NETWORK INTRUSION DETECTION SYSTEM | PFSENSE, SURICATA, FILEBEAT, EVEBOX AND

KIBANA

2022

- Deployment of NIDS using Suricata as IDS, Pfsense as Firewall, Filebeat for forwarding for forwarding logs and Kibana for Visualizing Alert

### FIRE ALARM SYSTEM | ADRUINO UNO

2021

- Developed a prototype of Fire Alarming System using a Aduino Uno
- The system triggers a warning alarm upon detecting fire

### SMART WALKING STICK | ULTRASONIC SENSOR, ARDUINO NANO AND BUZZER

2022

- Developed a prototype of Smart Walking Stick using a Arduino Nano
- The system is implemented into a PVC pipe
- The system was developed for Blind people to be able to navigate freely in the environment

### SMART GARAGE DOOR | ADRUINO UNO

2022

- Developed a prototype on Smart Garage door using Arduino Uno, Servo motor, LCD display and Ultrasonic Sensor
- The system open the garage door automatically when a car approached

### SMART TRASH BIN | ADRUINO UNO

2022

- Developed a prototype of a smart trash bin
- The system is implemented in a trash bin which makes it to open it's lid automatically upon detecting an object
